250 × 250 sample 1: late convergence, 100 steps per integrator
Display zoom only; points outside these ranges are clipped, stopping thresholds unchanged
Approach to the strict noise threshold
Raw residual / actual noise norm
Accepted optimizer steps
Euler
RK4
Primary: 1 × noise
Secondary: 1.05 × noise
Late image accuracy at the same saved states
Clamped image relative L2 (%)
Accepted optimizer steps
Euler
RK4
First raw crossing: 1 × noise
First raw crossing: 1.05 × noise
